

Imagine That! and Future Tech

Watch the love for technology spark in your child as we make learning FUN!
Specializing in STEAM programs! This is how we are meant to learn!

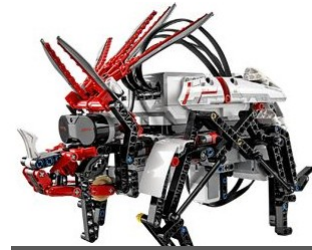

Robotics Club—Holy Spirit

Exciting activities for Spring! This is an amazing program for **Robotics** enthusiasts. Smaller groups and longer sessions allow for more in-depth studies!

Grades 4-6 Wednesdays 1 hour and 30 minutes

LEGO® MINDSTORMS® EV3 For our older students, we offer 3 Robots for Spring session! The robots will focus on different sensors or motors and how to program them for operations. Students will need to be able to focus, use reason, and work well within a team setting. The R3ptar can sense an object as it approaches and will strike without warning using the UltraSonic Sensor.

The Tracker bot has several different grips and attachments that pickup, move and spin around. For each version of the tracker students will have to use different programming sequences. We are also offering the EVug3, a bug like machine that will use its pincers to grab and pick things up! This spring your students will pack in a lot of learning and even more fun!

Class Information

Schools	Program	Dates	Day and Time	No class days	Fees (Early/Regular)
Holy Spirit Robotics Club	EV3 Robotics- Grades 4-6	1/31-4/25	Wednesday 4:00-5:30	3/14	\$324/\$344
